GroundWidgets

GROUNDPad™

Chauffeur Communication

GroundPad™ - **A simple tablet solution that instantly helps your company stand out from the competition!**

- Complete Reservation Details Communicated
- Driver Status Updates Transmitted Instantly
- Professional Airport Signage
- Instant Receipts / Paperless Trip Sheets

How it works

GroundPad™ leverages state of the art tablet technology providing service providers with a comprehensive two-way chauffeur communication system. **GroundPad™** provides the chauffeur with all of the information that they need wirelessly. The device creates an efficient and professional workflow, resulting in increased productivity. **GroundPad™** minimizes paper and voice communication, allowing the office staff to focus on critical business issues.

Features

- Log onto the dispatch system using chauffeur ID and Password
- Instant alert on reservation assignment
- Ability to view full reservation details
- Professional airport signage
- Dispatch status reporting – on location, circling, passenger on board, en route stops, near drop off and ride complete
- Book into a zone or area for queuing and alert dispatch of idle status and minutes

Key Benefits

- Optimizes dispatch and chauffeur communications
- Professional name signage tool
- Differentiates your service levels
- Leverages advanced technologies
- Improves passenger visibility and service
- Supports instant receipts on request
- Eliminates paper trip sheets
